Education

Maulana Azad National Institute of Technology, Bhopal

2023-2027

Bachelor of Technology in Electrical Engineering

CGPA - 8.90

Sri Vidya Junior College, Hyderabad

2021-2023

Class XII (PCM)

Percentage: 97.7%

Technical Skills

Languages: C++, C, Python, JavaScript, SQL, HTML

Developer Tools: Git, Github, dotenv, Postman, Visual Studio Code

Technologies/Frameworks: LangChain, RAG (Retrieval-Augmented Generation), ChromaDB, HuggingFace Embeddings, NumPy, Pandas, Matplotlib, ReactJS, Tailwind CSS, Node.js, Express.js

Coursework: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Machine Learning, Database Management System

Projects

EchoMind - AI Meeting Assistant | *Python, LangChain, Whisper AI, Sarvam AI, Mistral AI, ChromaDB*

 [Link](#)

- Built a **terminal-based**, multilingual meeting-intelligence pipeline in **Python**, using local **Whisper AI** and the **Sarvam AI** speech-to-text-translate API to transcribe English and Hinglish audio from YouTube videos or local files.
- Engineered a dual-engine transcription system that auto-selects between offline **Whisper** inference and a chunked **Sarvam AI** API workflow based on input language.
- Designed **7 modular LangChain LCEL pipelines** — map-reduce summarization, title generation, structured extraction (action items, decisions, questions), and retrieval-augmented Q&A — all powered by **Mistral AI**.
- Architected a **RAG** system using **ChromaDB** and **HuggingFace** sentence-transformer embeddings for top-k semantic retrieval, enabling grounded, context-only conversational querying over meeting transcripts.

DevGlance - Full-Stack Collaborative Code Editor  | *React, Node.js, Express, MongoDB*

 [Link](#)

- Engineered a full-stack collaborative coding platform using **React 19** and **Monaco Editor**, featuring resizable workspaces, **5 curated problems**, and an integrated **AI Assistant** supporting **9 programming languages**.
- Architected real-time pair programming via **Stream SDK** (video/audio) and custom event channels, achieving **<120ms** sync latency, and engineered **password-protected secure rooms** for private collaborative sessions.
- Implemented a responsive UI with **Tailwind CSS**, **DaisyUI**, and **React Query**, integrating an external compiler API for live code execution to achieve **100/100 Best Practices** and **97/100 Accessibility** on Google PageSpeed Insights.
- Designed **8 RESTful API endpoints** for session CRUD and token management, integrated **Clerk** authentication, and deployed the scalable architecture across **Vercel** (Frontend) and **Render** (Backend).

Responsibilities

Roobaroo Cultural Society, MANIT Bhopal

Feb 2024 – Present

Video Editing Head

- Conceptualized and edited 10+ high-impact videos and reels, using precise visual storytelling and sound design to convey compelling narratives.
- Generated 110K+ combined views across edited content, strengthening audience connection and boosting the society's online presence, collaborated with multiple external clients

Astro Alliance, MANIT Bhopal

April 2024 – Present

Designing Head

- Produced visually immersive space-themed videos blending astronomy, storytelling, and cinematic editing, using motion graphics and ambient soundscapes to enhance audience engagement.

Achievements

- Secured LeetCode contest rating of 1712 (Top 12.72%), demonstrating strong algorithmic and problem-solving skills.
- Solved 400+ problems across LeetCode, Codeforces, GeeksforGeeks and other platforms.
- Achieved a Top-10 position as a member of Team KLASHMAP in the Swafnix AI Agents Hackathon 2025.
